

# Towards Diachronic Corpus of Polish Latin

## Main points

- in this **proof-of-concept study** we retrieve Polish Latin texts composed up to ca. 1800 using publicly available OCR / HTR models
- the goal** is to extend an existing medieval resource and to promote the corpus-based research on the diachronic use of Latin in Poland

## eFontes. The Corpus of Polish Medieval Latin

### Time and Space

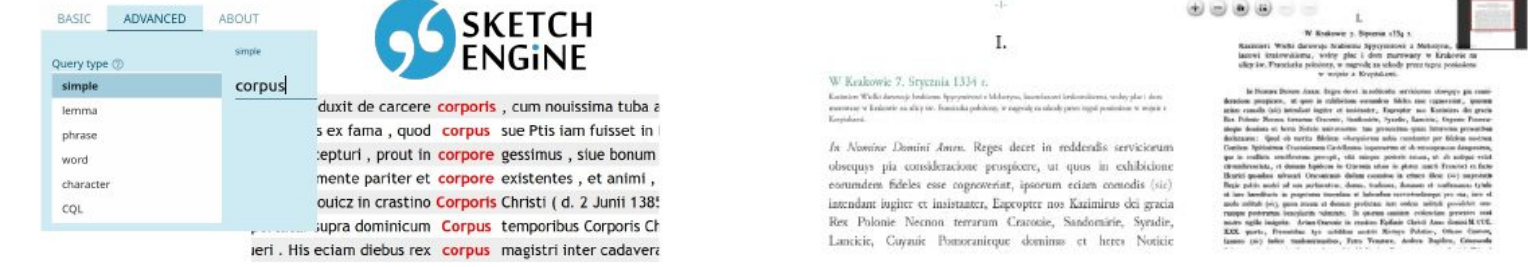

### Representativeness

### Linguistic Annotation

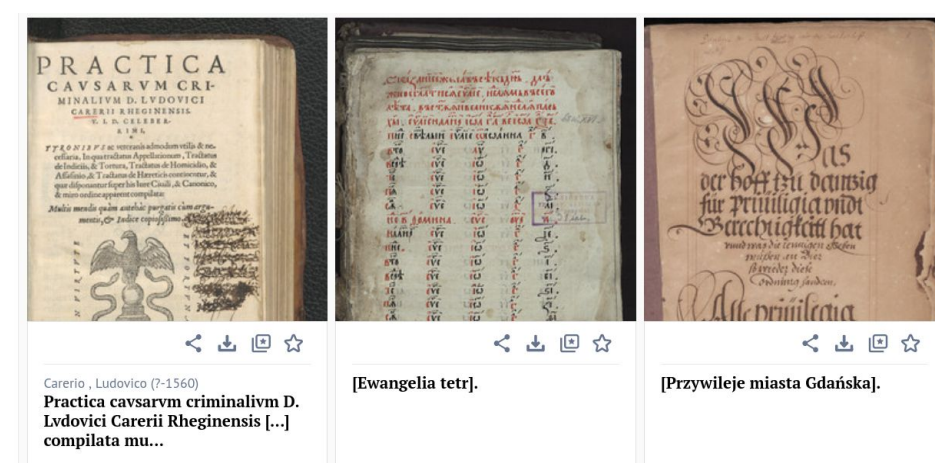

### Access

corpus.scriptores.pl

editiones.scriptores.pl

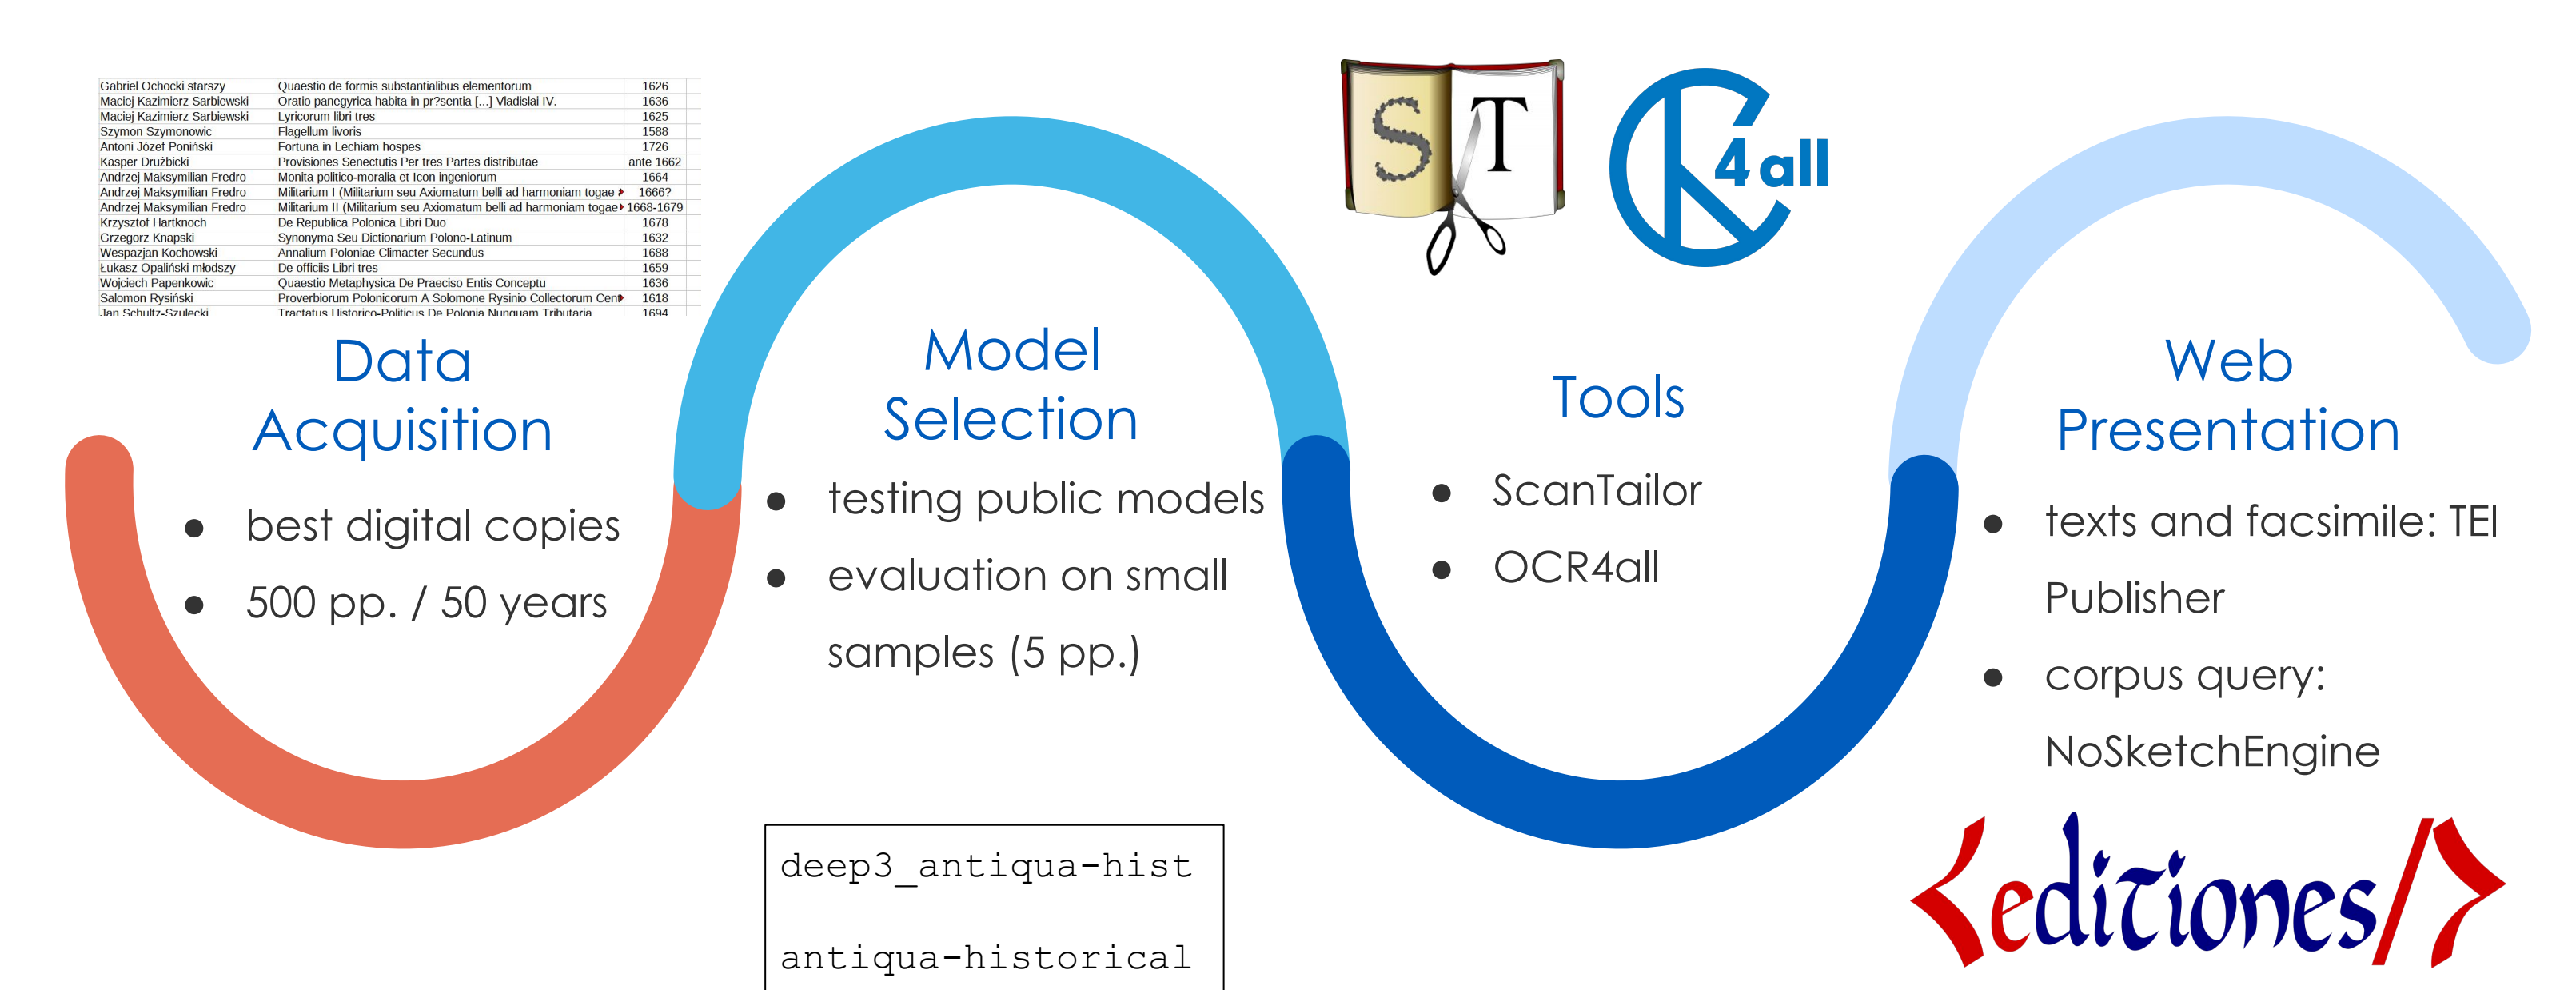

## Extending the eFontes Corpus

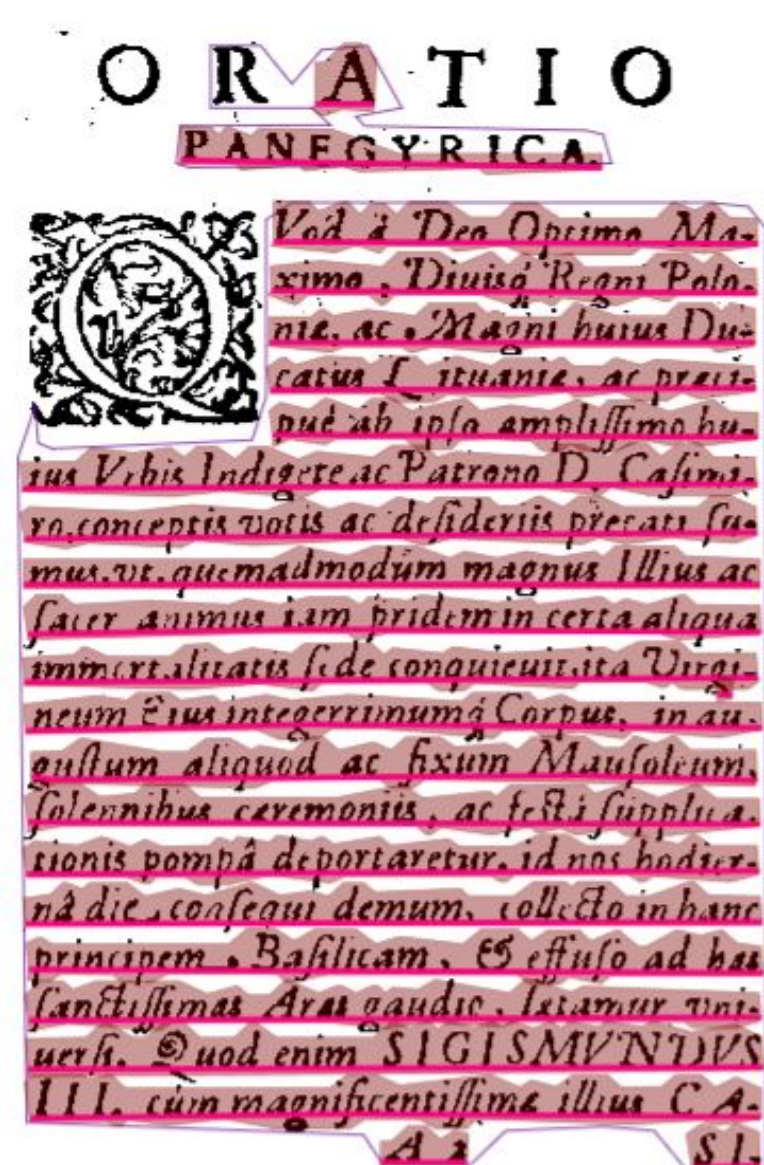

### Data Sources

digital libraries

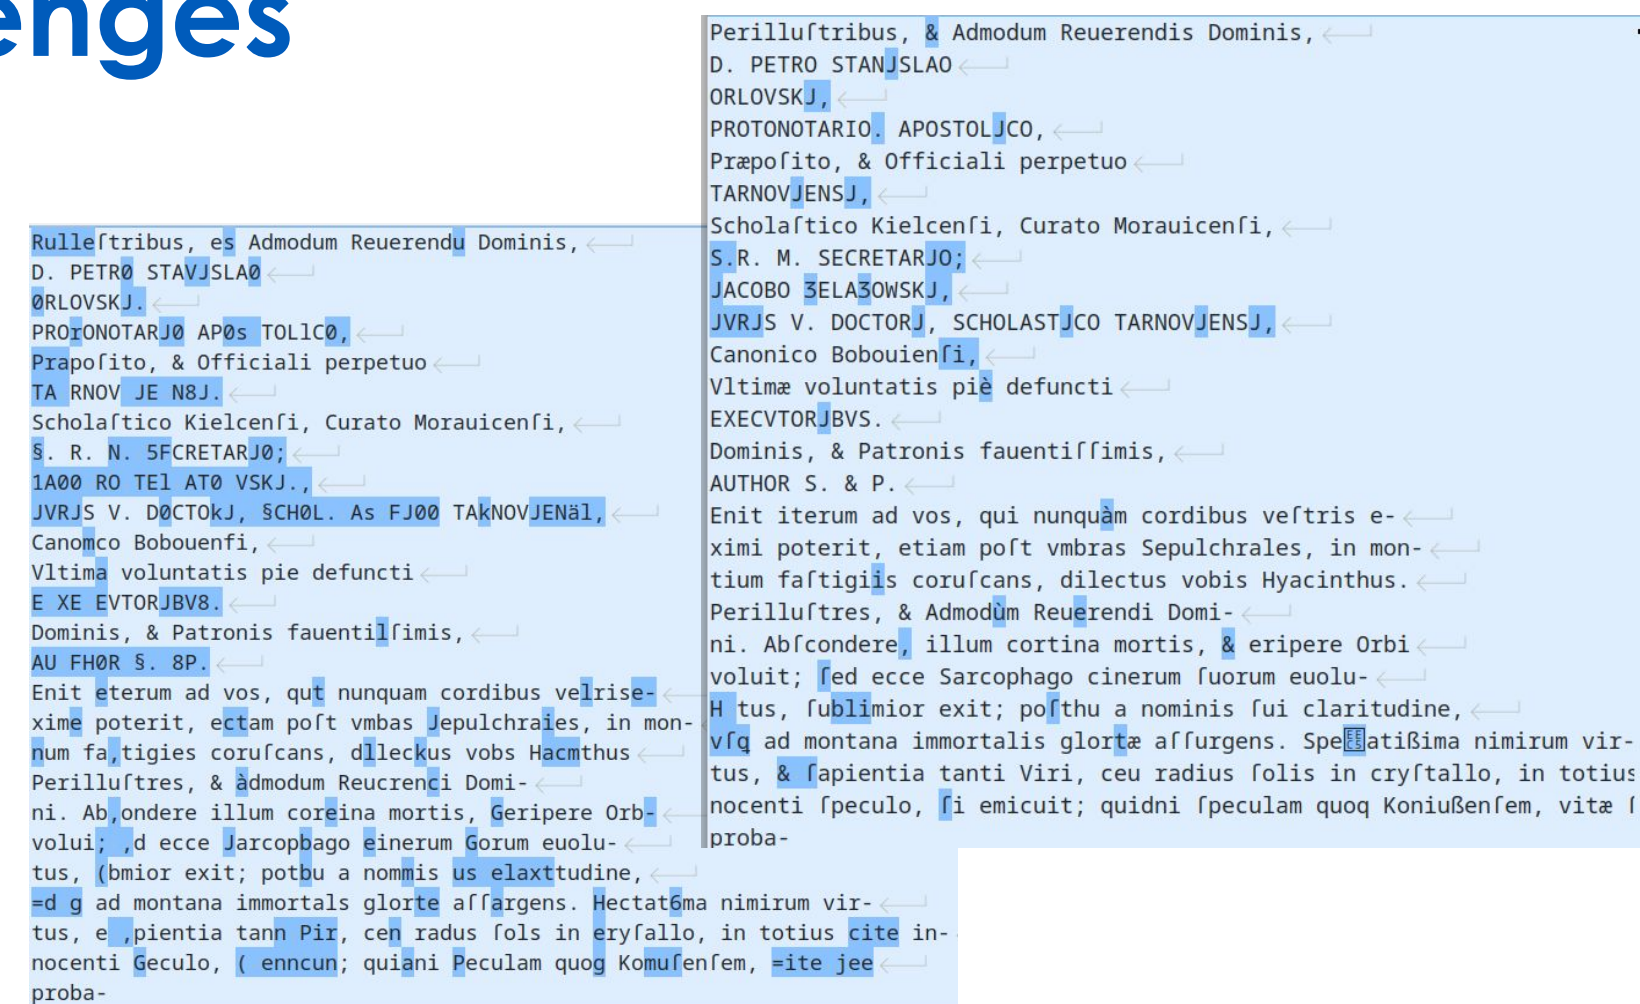

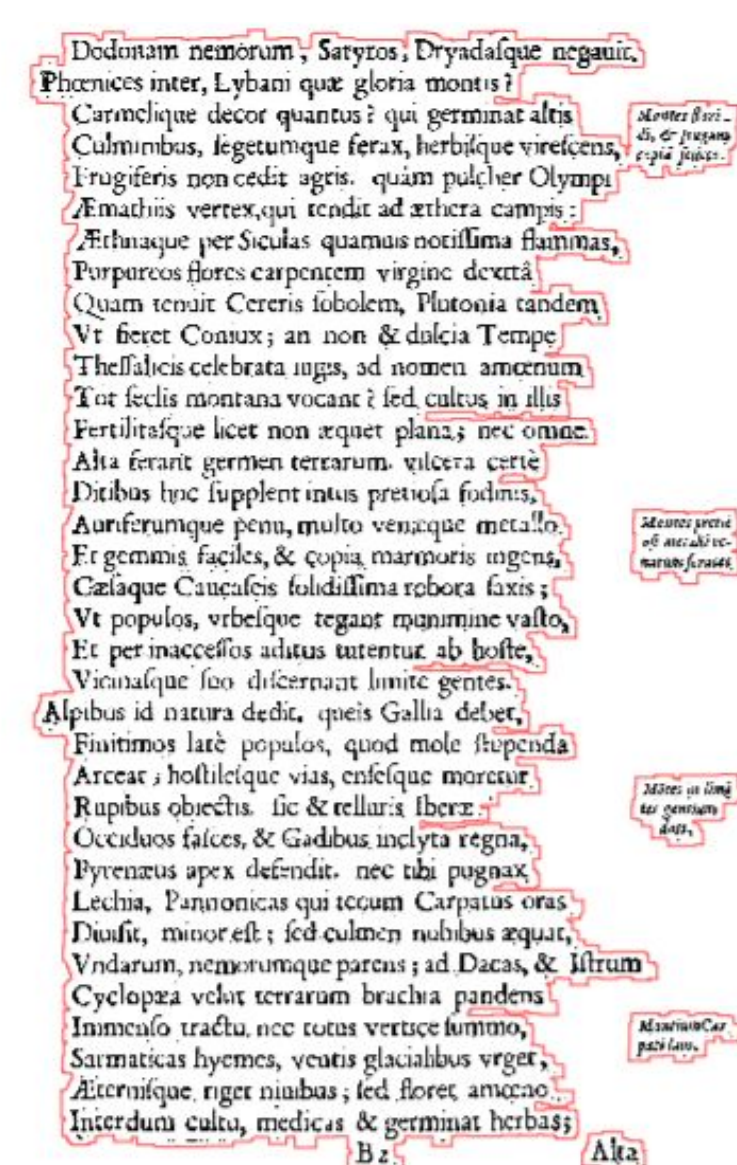

## Workflow

## Challenges

Handling "Difficult" Layouts

### Informal Model Evaluation

(deep3\_fraktur\_hist/0 v deep3\_antiqua-hist/0)

- the NLP resources for Baroque and later Latin are scarce
- planning text acquisition is difficult due to the quality of metadata in digital libraries

## Perspectives

### Evaluation

producing more ground-truth data for rigorous HTR model evaluation

### NLP tools

training tagging tools for Renaissance, Baroque and later Latin

### Manuscripts

applying HTR models for texts preserved in manuscript

### Metadata

improving the quality of metadata
